ABOUT SMART DRAIN PRO

Smart Drain Pro is an innovative technology that automatically drains your water heater using an app on your phone. This cutting-edge solution was brought to life by Army veteran David Sims, who, with the help of his dedicated partners, turned a simple idea into a revolutionary product. Designed to make maintenance easier and more efficient, **Smart Drain Pro** puts control right at your fingertips, ensuring your water heater is always in top condition. Say goodbye to manual draining and hello to a smarter, more convenient way to manage your water heater.

Inventor: **David Sims**

OUR ADVANTAGES

Extend Your Water Heater's Life:

Manufacturers recommend flushing your water heater at least twice a year to prolong its life. Many people neglect this task, but with Smart Drain Pro, you'll never have to worry about it again. This device can extend the life of your water heater from 8 to 15 years, saving you thousands of dollars.

Prevent Sediment Buildup: Your water heater is one of the hardest working appliances in your home. Neglecting it can lead to a buildup of sediment, decreasing efficiency, increasing energy costs, and contaminating your water. Upgrade to Smart Drain Pro and protect your investment today.

Effortless Installation: The Smart Drain Pro is designed for quick and easy installation, making it accessible to people of all skill levels. You'll have your Smart Drain Pro up and running in minutes. Enjoy the convenience of seamless setup and immediate protection.
